

Single Cartridge Illustration

Single Serving Automatic CLIA

POCLIA

Accurate

- Enzymic (ALP) chemiluminescence, accurate full quantification
- Quality control and calibration consistent with large luminometers
- CV=5%
- No hydraulic circuit, ultra-low failure rate

Fast

- Result within 15 min
- 32 (single chamber)
- 8 channels/chamber in parallel, quickly process a large number of specimens
- Each chamber operates independently and flexibly

Intelligent

- Humanized operation interface, support two-way LIS connection
- Automatic item identification, saving manpower
- Tips, magnetic sleeve grab and kick detection

Ecmomic

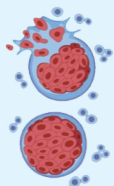

- Single package without reagent waste
- Ready to disassemble and use, no reagent loss
- No need for additional consumables such as cuvettes, Tips
- LCD touch screen, built-in computer, printer
